THE HUMAN SIDE OF INNOVATION: RESILIENCE & EMPATHY

How can empathy help you to take your research to the next level? What do you know about self-management in complex and volatile environments? In this workshop, you will learn key principles to get up close and comfortable with your potential users, customers or other stakeholders. You will also learn about useful mindsets to cope with stressful situations, and develop strategies that suit your needs. Take a step back, open your mind, and learn to view ideas and concepts from different perspectives. Discover how to train your inner strength by using your personal resources.

Who we are

Young Entrepreneurs in Science is an interactive workshop programme for PhDs and postdocs to help you ignite your entrepreneurial spirit! Together with your peers, you will learn methods and skills to realise your innovative potential.

Admission is free and no previous knowledge is required.

Workshop Goals

- Learn about useful mindsets to cope with stressful situations and practise creating room for positive perspectives
- Develop resilience strategies that suit your needs
- Key aspects of empathy in human-centred design
- Practise empathy and perspective shift
